

**Christine Petersen**, an authority on productivity and value added management, is the founder and Managing Director of Time Technology. With a long and successful career in both learning and development and the corporate world, Christine has always been at the forefront of helping leading individuals, teams and organizations meet the demands of a constantly changing business environment. Christine developed her intellectual property, Time Technology, in response to a growing demand by business leaders for practical ways to achieve better control in the workplace.

Recognizing that the information knowledge age has dramatically changed the work environment, Christine developed a planning methodology applied through technology to help executives achieve a better work life balance. Since establishing this program in 2003, Christine and her team of accredited facilitators have helped over 5,000 busy executives in the Asia Pacific region to raise productivity and reduce their time investment. Leading international organizations including Barclays, British Consulate-General, CLSA, Credit Suisse, Hongkong Land, Jardine Shindler, Johnson Stokes & Master, Merrill Lynch, Shell, S.W.I.F.T, Walt Disney and many more have successfully undertaken Time Technology programs.

Prior to establishing Time Technology, Christine owned a Sydney franchise of a worldwide time management company. During this thirteen-year period, Christine and her team grew the business to be the largest and most successful learning and development centre in a global network of over 300 offices. With clients such as Microsoft Australia, IBM Australia, Compaq, Macquarie Bank and ING, they held this leading position for seven consecutive years.

Christine commenced her career in the construction and building industry where she broke the glass ceiling for women in the corporate world by becoming the first woman to be appointed on the National Manufacturers Council and ranked in the top 5% of women managers at the time. For over 15 years, Christine held various senior management positions in sales and marketing and was a fellow of the Australian Institute of Management. It was during these years that Christine played a major role in total quality management and value added management. It was also at this time that she gained first hand experience in enhancing productivity and the company's bottom line by improving processes.

Christine has spent her lifetime empowering corporate executives to work smarter and is a much sought after public speaker on this topic. She is the Vice Chair of AustCham Technology Committee and a member of the Community Business Leadership team (CBLT).

**Lilian Wang** delivers the full range of Time Technology services, including workshop facilitation, personal coaching, coach the coach certification and custom presentations.

Over the past year, she has coached hundreds of senior executives, middle managers, business owners, and frontline officers in organizations including Merrill Lynch, Johnson Stokes & Masters, Deutsche Bank, Cigna Worldwide Insurance, Colliers International, Fresenius Kabi, FedEx and Hongkong Land.

In addition to coaching and facilitating Time Technology programs, Lilian is also very enthusiastic in marketing the Time Technology brand in both local and regional markets. She strongly believes that everything has a Tipping Point and her responsibility is to start a positive epidemic around the Time Technology planning methodology.

Before joining Time Technology, Lilian served at her alma mater, The Chinese University of Hong Kong in the area of internationalization. She also brings years of work experience in various industries including the media and tourist industries as well as management consultancy in government sector.

Lilian is committed to life long learning. She graduated from the Chinese University with BSc in Journalism and Communication. Thereafter, she has pursued studies in language and literature in Germany, postgraduate certificate in Translation and a two year MBA program with the Australian Graduate School of Management.

Lilian speaks fluent English, Cantonese, Mandarin and some German.

**Edmond Sze** has several years of professional experience in learning and development. As a Management Consultant at Time Technology, Edmond aspires to help busy executives create more time for strategic planning, team coaching and ultimately, a more balanced life.

Edmond gained his experience with all-round involvement in learning and development in the public utility, hospitality and insurance service sectors. As a professional consultant, he has mapped out training curriculum for senior executives and management associates as part of organization's talent development strategies. Edmond specializes in designing and facilitating personal effectiveness and customer service workshops. In addition, he is experienced in introducing experiential based learning activities to develop leadership capability of individuals and build high performance teams.

Edmond received his Bachelor Degree in Commerce from the University of New South Wales. His passion in pursuing a career in learning and development has led him to continuously look for learning opportunities. He was awarded the Diploma in Management of Training & Development by Hong Kong Productivity Council. He is also a Certified Coach Facilitator for the Coaching Clinic at Corporate Coach U and an Accredited Practitioner of Harrison Assessments for Hiring & Selection.

**Matt** has over 15 years of experience as a facilitator, project manager, trainer, consultant, and educator, mostly in the technology field. Originally from the United States, he has worked with many Fortune 500 companies in addition to many other multi-national corporations in all areas of the business world. Matt has also implemented technology solutions for local and national governments.

Prior to joining Time Technology, Matt took a holiday from the business world to teach at a disadvantaged urban school in New York City. He taught English and History to special education students. As a teacher of disabled children with special needs, Matt insists that he learned more from his students than they learned from him.

Believing that knowledge is power, Matt has served on several professional development committees throughout his career. Also believing that knowledge should be shared, he takes great pride in teaching the TimeSmart methodology to our clients.

Matt holds a Business degree from The Ohio State University as well as a Master's degree in Education from The City University of New York. Both serve him very well as a TimeSmart facilitator and coach.

Always community service minded, Matt keeps busy outside of the workplace by partnering with organizations which help underprivileged children as well as volunteering with animal rescue and shelter operations.

**Corinne** brings with her over 10 years of solid experience in user-technology applications and human resources for both the public and private business sectors. She is a certified workshop facilitator and personal coach for Time Technology's TimeSmart programs.

Combined with in-depth practical knowledge of technology and experience in human resources, Corinne is capable of presenting training programmes and executive coaching solutions to meet the ever-changing needs of today's corporate environment. Corinne is involved in developing Time Technology programmes in both local and regional markets.

Through her enthusiasm and commitment to technology and human resources she is able to provide the highest quality of training to suit the needs of our clients. As a result, her dedication to the work is often confirmed through the excellent business outcomes for our clients.

Previously Corinne worked closely with senior management in providing executive consultancy services and administration to senior management in widespread industries.

Being born and raised in Hong Kong, she was educated in both Hong Kong and Australia. Corinne possesses a Bachelor degree in Business with double major in Human Resources Management and End-user Computing from the University of Southern Queensland. She was also awarded a Master of Business Administration from the Australian Graduate School of Management. Corinne is a Member of Hong Kong Institute of Human Resources Management, MIHRM (HK).

Corinne is fluent in English, Chinese (Cantonese & Mandarin) with knowledge of sign language. Full of energy, in her spare time, Corinne actively volunteers with a number of non-profit organizations.
